

```
def reverse(str):  
    rev=""                #Sample input: 1234abcd  
    for x in str:  
        rev=x+rev        #Expected output: dcba4321  
    print(rev)  
reverse(input())         #My output: dcba4321
```
